

ReLoop RH-2500

As consequent advancement of the popular RH-2400 series, the successor offers an even more precise bass sound thanks to the completely closed construction. Despite powerful kicks the sound characteristics remain transparent: Brilliant mids and highs and high output make monitoring and mixing easy. Improved wearing comfort could be realized due to reduced weight and a new headband construction. The bordered ReLoop sign on the ear cups top off the new RH-2500's appearance.
