

Floorstanding speakers

RAPTOR 7

wilson

The Wilson Raptor 7 floorstanding speaker cabinet is a modern and elegant design in two classic colors - black and white. It blends perfectly with the rest of any interior, thus fitting into the aesthetics of both subdued and extravagant rooms.

DRIVERS AND CROSSOVER

The crossover developed for this design has been integrated to ensure that all the elements in this design are consistent in sound. It includes two low-midrange drivers 6 1/2" each, and a 2.5 cm tweeter with a fabric dome.

GREAT BASS EXPERIENCE

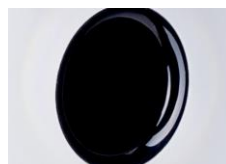

The bass is of surprisingly good quality, with little coloration, clear and dynamic at the same time. Very good stereophony and nice timbres.

They surprise you with their naturalness, pleasant sound with all the elementary characteristics of good audiophile hi-fi.

BASS REFLEX

High quality enclosure with front firing Bass Reflex allows the speaker to achieve much higher efficiency in the low frequency range

Cabinet: White with wood grain texture
Grille: black

DESIGN

The subdued design of the Raptor 7 is a design compromise between classic and modern floorstanders, and they undoubtedly attract attention. More than a meter tall, the slender set is distinguished by its high quality workmanship. The cabinet surfaces are decorated with wood grains and a high-gloss lacquered front.

CONSTRUCTION

Cabinets are available in classic colors: white or black. These colors emphasize elegance, and the slender silhouettes of the bases will easily fit into any - modern and classic - interior. The front of the cabinet is covered with a grille, made of special plastic. In addition to aesthetic qualities, it performs an important function, reducing unwanted noise and eliminating sound coloration. The cabinet, although quite large, will fit into any room, adding a unique class and chic.

Cabinets are equipped with a set of spikes that isolate vibrations coming from the ground. The set also includes a manual for the speaker - it will facilitate proper assembly and installation in the audio system.

HOME CINEMA AND STEREO

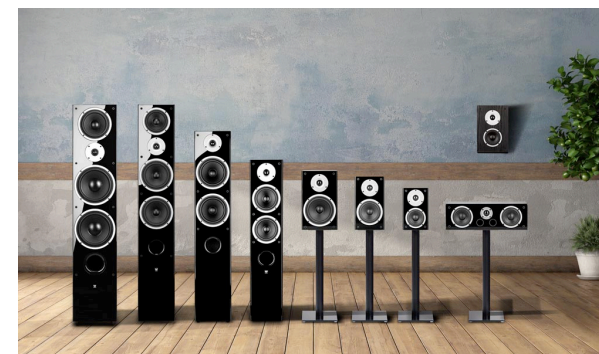

The proper selection of the parameters of a home theater speaker, its positioning in the room and the sound quality determine the final sound of the entire system. The Raptor 7 set will perform perfectly in the role of a front column. The power and sound quality will create a kind of reference point for the other speakers, and expecting a decisive and powerful sound - it is difficult to find a better proposal.

Raptor series loudspeakers take us to another dimension of action cinema... it also ceases to be a problem to visit any concert hall, even the largest. Unforgettable experiences, emotions and great sound cease to be available only to wealthy audiophiles.

SPECIFICATION

Recommended amplifier:	50 to 180W
Frequency response (± 3 dB)	40-20,000 Hz
