

Bookshelf loudspeaker RAPTOR 1

wilson

Raptor 1 is a bookshelf speaker made of the highest quality materials and equipped with high quality components.

Raptor 1 is a high quality product that goes hand in hand with an aesthetically pleasing classic design. Raptor 1 is technically and visually a perfect match for the other speakers of the Raptor series. It can be configured as a part of a home theater system or as a part of a stand-alone small Hi-Fi speaker system.

Timeless black and white are a guarantee of a perfect fit into any space. The Raptor series and the Raptor 1 speaker have been designed to meet the expectations of even the most demanding cinema enthusiasts.

Solid and streamlined cabinet with back firing Bass Reflex offers high efficiency in the low frequency range.

High quality housing covered with aesthetic layer of modern vinyl, with a wood-like surface finished with a slight gloss on the entire surface of the side, top and back walls.

The material provides long-lasting resistance to colour change and unwanted effects of light, which is especially important for a white finish, when the speakers are placed in very sunny rooms.

Together with the available material grilles in classic black, mounted on traditional mounting pins, the entire column looks attractive and does not disturb the interior with its presence.

Cabinet: White with wood grain texture
Grille: black

GREAT AND AFFORDABLE CHOICE

Construction in a classic form is equipped with a tweeter: 1" (25 mm) with soft dome and powerful woofer/midrange 5" driver, providing a versatile depth of experience in both stereo and home theater.

It is a good choice also for users looking for an decent speaker for an additional system in a second room or office. These speakers will work well with a wide range of small stereo systems.

The Raptor 1 is our default speaker for a variety of home theater setups, and is a complement to the Raptor Vocal and room-matched Raptor Series front speakers.
